Please help us complete our inventory using any of the methods below to improve our community water supply and update your vital emergency contact information in our local office. Your support is greatly appreciated!

Help Us Protect Our Water Supply

The U.S. Environmental Protection Agency and the State of Indiana are requiring us to document the material of all service lines in our community water system including the water line running from the meter to the inside of your home or business.

Please take a quick peek at the water lines on the *inside of your home* coming in from the meter and tell us what material it is made of—if it is not obvious like copper or plastic, a detailed explanation of how to determine the material can be found on our survey link or from printed materials at the Water Department.

Not a fan of the internet? No problem! Call us or stop by the office and we'll ask you the survey questions over the phone or in person.

Here's How to Take Our Survey—Choose Any of the Following
